

06/21/2022 Ashtars light language

Ashtar must have known that I would get up very early and feed the birds. They were feeding their offspring. With his awakening, great amounts of information flowed in. Our previous conversations came to fruition today in the form of expressing light, sound and frequency language as images, which, unlike templates, transmit the energies directly in such a way that the energies and information reach the viewer that are needed at the moment.

The direct resonance with the sealed energy images can, for example, accompany you in your meditation, lead you into peace and relaxation, create a balance or generate the knowledge of the connection with the stars and the Ashtar Fleet. The energies of the light language images work on different levels and can be an enrichment for your service in the light.

Ashtar:

"We of the Galactic Federation wish to encourage the sound and energies of willingness to step outside, to step into the frequencies of Earth and to trust the evolution into the Light.

For this reason you are receiving the Galactic Federation Language of Light for the upliftment and transition period.

The language works non-verbally, in connection with the reception through the eyes and the integration into the light body. Resonances decide on the further course. You are guided and led by the energy and the information.

The light language of the Ashtar Command, the Ashtar grouping that guides the light levels for the transition of Earth, is both a recognition process and a wake-up call. Each of you is taking your intended position to achieve a required level of communication and communion."

Ashtar:

"Beloved Brothers and Sisters of Light, the time of transformation is approaching. It is the transformation that is becoming unmistakably visible and is guiding each one into a new form of energetic adjustment for circumstances that arise from it.

During the wave of transformation and its effects, you are being trained in your own power, and your consciousness is receiving a steady expansion that comes with the high energy level.

Let us work together, regardless of where we are, through the language of light alone, a corridor of recognition for the new is created and peace is strengthened.

The Galactic Federation Language of Light is an intelligent tool and keeps out lower vibrations and intentions of those who do not have the best interests during Ascension. So embrace the energies that suit you and connect with the community of our team. The Ashtar Team welcomes you into the flow of honourable energies that come with our connection.

Beloved souls, beloved ground team, I know the difficulties and the pressures that come from often being pushed to your limits or not knowing what to do in the face of the situation and external developments.

I would like to tell you that, from the comprehensive view that is available to us on our level, a much more meaningful picture serves the development. I pass this image on to you: It is love in action that flows to you, supports you and helps you to see all given circumstances as development processes into the new, harmonious being.

3

Hold on, clear your bodies and your thoughts. The Light is near! The Ashtar Fleet is steadfast in holding this line of Light for you. Our service and blessings are with you. I am Ashtar. Go in peace."
